Following publication of the original article [1], the author identified an error in Graphical Abstract and updated Acknowledgment section.

In Graphical abstract, there is a type on the unit E_B (eV) which has been updated with this correction.

[†]Tae Gyu Rhee and Nguyen Huu Lam contributed equally to this work.

The original article can be found online at <https://doi.org/10.1186/s40580-024-00427-4>.

Graphical abstract

Two different pseudo-gaps and corresponding phase transitions are observed in monolayer orthorhombic CoSe₂ grown on graphene substrates.

The work supported by MOLIT [Innovative Talent Education Program for Smart City] has been included in Acknowledgment statement.

Acknowledgments

This work is supported by National Research Foundation (NRF) grants funded by the Korean government (NRF-2019R1A6A1A11053838, NRF-2020R1A2C200373211, NRF-2021R1A6A3A14040322, RS-2023-00220471, RS-2023-00284081, RS-2023-00280346, RS-2023-00258359), [Innovative Talent Education Program for Smart City] by MOLIT, and Semiconductor R&D Support Project through the Gangwon Technopark (GWTP) funded by Gangwon Province (No. GWTP 2023-027). BKC was supported in part by an ALS Collaborative Postdoctoral Fellowship. This research used resources of the Advanced Light Source, which is a DOE Office of Science User Facility under contract no. DE-AC02-05CH11231. Experiments at PLS-II were supported in part by MSICT and POSTECH.

The original article has been corrected.
